

FRONT COPPER

TONER TRANSFER | 52 x 70 mm | Print at Actual size / 100%

Front artwork is already mirrored.

Place the TONER side against copper. Do not mirror again in the printer dialog.

Black = copper to retain. Small white hole centres are drilling pilots.

Board outline: 52.00 x 70.00 mm

Measure BOTH scale bars before transfer. Disable Fit / Shrink / Borderless scaling.

Use the corner crosses on scrap margin to align the two faces before trimming.

Check actual LED lead forming and component footprints before etching.

This board requires 30 wire-filled vias and 5 insulated jumpers; see the guide.

50.00 mm horizontal

50.00 mm vertical

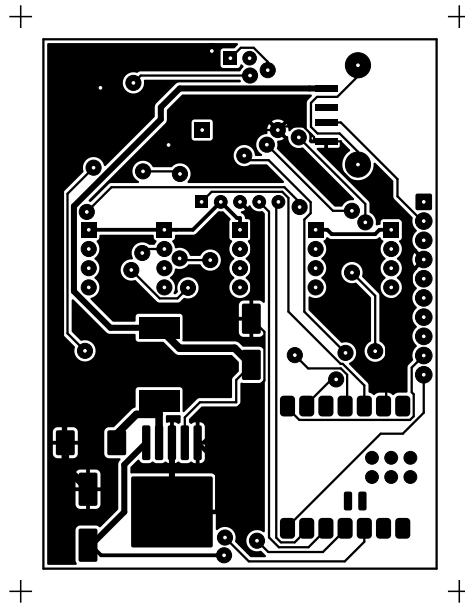

REAR COPPER

TONER TRANSFER | 52 x 70 mm | Print at Actual size / 100%

Rear artwork is intentionally not mirrored.

Place the TONER side against copper. Do not mirror again in the printer dialog.

Black = copper to retain. Small white hole centres are drilling pilots.

Board outline: 52.00 x 70.00 mm

Measure BOTH scale bars before transfer. Disable Fit / Shrink / Borderless scaling.

Use the corner crosses on scrap margin to align the two faces before trimming.

Check actual LED lead forming and component footprints before etching.

This board requires 30 wire-filled vias and 5 insulated jumpers; see the guide.
